PROFESSIONAL SUMMARY

Full Stack Developer with 4+ years of experience building high-performance, scalable web applications using React.js, TypeScript, Node.js, and modern full stack technologies. Proven track record of owning features end-to-end from requirements to deployment with 80%+ test coverage, 95% on-time delivery, and a strong focus on performance engineering and optimized delivery techniques.

TECHNICAL SKILLS

Frontend: React.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Ant Design, ShadCN, Framer Motion, Responsive Design, Cross-Browser Compatibility

State Management: Redux Toolkit (RTK), React Query, React TanStack, Zustand, Context API, React Hooks

Backend: Node.js, Express.js, Python, RESTful API Design, JWT Authentication, NextAuth, Auth0, RBAC, Secure Coding

Databases: MongoDB, PostgreSQL, MySQL, Firebase Firestore — schema design & query optimisation

Testing & QA: Jest, React Testing Library

DevOps & Tools: Git, GitHub, CI/CD Pipelines, Azure DevOps, Agile/Scrum, Code Review

AI Integration: OpenAI API, Claude AI, Grok AI

Other: Next.js (SSG/SSR, ISR), i18next, Axios

PROFESSIONAL EXPERIENCE

MERN Stack Developer (Frontend Lead) — aicruit.ai

AI-Powered Recruitment SaaS Platform | Canada (Remote) Jan 2024 – Jan 2026

- Architected and maintained a scalable React.js + TypeScript frontend with reusable components built on Tailwind CSS, ShadCN and Ant Design, powering 500+ daily active users with 99.9% uptime — owning the complete feature lifecycle from requirements gathering to production deployment.
- Designed and shipped RESTful APIs using Node.js and Express.js; enforced security through JWT and Auth0 authentication with role-based access control, slashing unauthorised login attempts by 75%.
- Drove frontend performance engineering by implementing code splitting, lazy loading, and React Query caching — reducing bundle size by 40% and API call volume by 60%; automated delivery pipelines via CI/CD, increasing deployment frequency by 80%.
- Championed quality by achieving 80% test coverage with Jest and React Testing Library; delivered 40+ features across 12 Agile sprints with a 95% on-time rate through active code review, sprint planning, and cross-functional collaboration.
- Partnered with UI/UX designers, product managers, and QA engineers to translate ambiguous business requirements into polished, production-ready features; continuously profiled and optimised performance across frontend and backend layers.

Full Stack Developer — eclipse-ai.com

Generative AI SaaS Platform for Surveys & Analytics | Australia (Remote) Sep 2022 – Dec 2023

- Built and owned full-stack features across React.js, Node.js, and Express.js for a multi-tenant SaaS platform; designed and consumed REST APIs and scalable MongoDB schemas to support high-volume analytics data with guaranteed integrity and security.
- Integrated the OpenAI Assistant API to surface AI-driven survey insights using Natural Language Processing (NLP) and sentiment analysis, cutting manual analysis time by 50%; configured Auth0 RBAC for secure, granular multi-organisation access control across the platform.
- Reduced client-side API calls by 50% through strategic use of Redux Toolkit and React Query; optimised NoSQL queries to improve response times and strengthen data security across all services.
- Managed end-to-end release cycles using Git workflows and Azure DevOps CI/CD pipelines, compressing release cycles by 50%; mentored junior engineers on state management and REST API design best practices.

MERN Stack Developer — devnation.pk

Learning Management System | Lahore (Remote) Jan 2022 – Aug 2022

- Led full-stack development of a Learning Management System serving 2,000+ students using React.js, Node.js, and Firebase, achieving a 90% user-satisfaction rate; architected the RESTful API layer with Express.js including secure authentication and RBAC.
- Engineered efficient state management with Redux, React Hooks, and Context API — reducing unnecessary re-renders by 40% and improving page load times by 30%; integrated Firebase Firestore for real-time data synchronisation across all user sessions.
- Defined and enforced code quality standards through structured peer code reviews and Agile best practices; built server-side services with Node.js and Express.js ensuring cross-browser compatibility and mobile responsiveness.

FEATURED PROJECTS

Memory Blogs — <https://momoriesblog.netlify.app/>

React.js · Node.js · CRUD Operations

- Developed a MERN blog platform with JWT-protected admin flows for creating, editing, and deleting posts and gallery images.
- Designed REST APIs with MongoDB pagination, category filters, and Cloudinary cursor-based image storage for optimised media management.
- Built a responsive React/Redux frontend with route guards, category tabs, paginated listings, and reusable gallery/image-picker components.

Angel Care Transit — <https://angelcaretransit.com>

Next.js · Node.js · Axios · Framer Motion · HIPAA Compliance

- Architected and delivered a Next.js medical transport platform serving 1,000+ clients; implemented SSG/SSR strategies for SEO performance, Framer Motion micro-animations for enhanced UX, and Axios interceptors for secure, token-based API integration.
- Engineered a HIPAA-compliant full-stack solution sustaining 99.9% uptime.

Einvotca — ERP System — <https://einvotca.com>

React, Redux, Node.js, Express, MongoDB, JWT, Cloudinary, REST APIs, Responsive UI

- Architected a scalable ERP platform for sales and purchase management using Ant Design Form.List for dynamic form generation, i18next for multi-language support (English + more), and AI-driven analytics dashboards backed by a robust PostgreSQL schema.
- Implemented automated CI/CD pipelines to streamline release delivery.

TECH-IOMES — Industry 4.0 Corporate Website — <https://www.tech-iomes.io/>

HTML, CSS, JavaScript, Bootstrap 5, EmailJS, Google Analytics

- Designed and built a responsive marketing website for an industrial IoT and ML solutions company.
- Implemented bilingual (English/Chinese) content switching with dynamic page rendering; integrated a contact form with client-side validation, Google reCAPTCHA, and EmailJS for automated email delivery.
- Built sections for product offerings, global project references, company updates, and mobile-friendly navigation; added Google Analytics to track visitor engagement.

EDUCATION

Master of Computer Science (MCS) CGPA: 3.92/4.0 2015 –2017

PMAS-Arid Agriculture University, Pakistan Specialisation: Software Engineering, Database Systems, Distributed Computing

MERN Stack Development Certification DevNation, Lahore 2021

KEY ACHIEVEMENTS

- Drove technical architecture decisions for 3 enterprise SaaS platforms collectively serving 10,000+ users, balancing scalability, security, and time-to-market.
- Maintained a 95% on-time delivery rate across 20+ Agile sprints, consistently shipping high-quality, well-tested code under tight deadlines.
- Reduced production incidents by 90% and deployment time by 80% by designing and implementing robust CI/CD pipelines with automated testing gates.
